Introduction

An ambitious and hardworking B.Tech graduate seeking opportunities to expand technical skills and contribute effectively in a dynamic work environment

Education

Carmel College of Engineering and Technology, Alappuzha 2022 – 2026
B.Tech in Computer Science and Engineering | **CGPA : 6.79**
(APJ Abdul Kalam Technological University)
Matha Senior Secondary School, Alappuzha Jun 2020 – Mar 2022
Higher Secondary Education
CBSE

Experience

AI/ML Intern | ICT Academy of Kerala, Trivandrum June 2025 – July 2025

- Underwent a 1-month internship on Artificial Intelligence and Machine Learning.
- Collaborated with a 4 member team to deploy a prototype model tested on 5+ real world datasets.

Projects

Multimodal Depression Detection System | Technologies: Python, Scikit-learn, NLP

- Co-created an AI framework that integrates behavioral and physiological data for early depression detection.
- Utilized a TWhin-BERT model for input text data embeddings and a Bidirectional LSTM (BiLSTM) network for extracting time-series features from wearable sensors.

Movie Success Prediction System | Technologies: React, python ,flask

- Developed a Movie Success Prediction System to estimate the likelihood of a film becoming successful based on pre-release attributes.
- Trained a random forest classifier model on TMDB datasets with features like budget, popularity, genre, cast/director success rates, and vote counts.
- Built a Flask-based backend to serve predictions and integrated it with a responsive React frontend for user input and result display.
- Designed a privacy-aware AI system utilizing NLP, transformer models, and CNN-LSTM architectures for the early detection of depression and anxiety.

Milk Management and Distribution System | Technologies: React, TypeScript, Tailwind CSS, PostgreSQL, Supabase

- Developed a full-stack web application to manage milk collection from farmers and distribution to customers via online and offline channels
- Implemented digital wallets for both farmers and customers, enabling transparent payments and real-time balance updates.
- Designed an admin panel to record daily milk contributions and automatically generate invoices for farmers.

Skills

Languages Python, C
Applications VS Code , Colab
Soft Skills Creativity, Adaptability, Problem Solving, Enthusiasm, Empathy

Achievements & Certifications

NPTEL : Programming in Java
Infosys Springboard : Python Foundation, Introduction to Artificial Intelligence
Internship : Artificial Intelligence and Machine Learning

Interests

Football, Travelling
